CAREER OBJECTIVE

Motivated Computer Science undergraduate with proficiency in Java and core CS concepts including Data Structures, Operating Systems, and Networking. Eager to apply skills in real-world projects and collaborative environments.

SKILLS

- **Programming Languages:** C | Java |Python
- **Technical Skills:** Data Structures | Algorithms | OOPS | Operating Systems | Computer Networks | Full Stack development
- **Tools:** Git & GitHub | MySQL | Kaggle
- **Soft Skills:** Adaptability | Team Collaboration | Quick Learner | Integrity
- **Languages Spoken:** English | Kannada

EDUCATION

• Vidyavardhaka College of Engineering, Mysuru – **B.E. (CSE)**	CGPA: 8.21	2026 – Present
• BASE PU College, Mysuru – **XII**	Percentage: 72.83%	2021– 2023
• Cauvery Public School, Mandya – **X**	Percentage: 82.50%	2020– 2021

PROJECTS

Dysgraphia Detection using CNN

- Designed and implemented a Convolutional Neural Network (CNN) model to classify dysgraphia from handwritten text images.
- Performed image preprocessing techniques including resizing, normalization, and feature extraction to enhance model performance.
- Trained and validated the model on labeled handwriting datasets to ensure robust and reliable predictions.
- Optimized model parameters to improve classification accuracy and generalization.
- Secured 3rd Place at PES University Apex Club Hackathon.

Earvan – AI-Based Hearing Assistance Application

- Developed an AI-driven hearing assistance application to support individuals with hearing impairments.
- Integrated AirPods connectivity enabling users to customize sound frequency levels based on personalized hearing profiles.
- Engineered an AI-based noise cancellation system to enhance speech clarity and reduce ambient background noise.
- Built a real-time adaptive audio processing pipeline for dynamic sound filtering and enhancement.
- Collaborated within a team to design and deliver a scalable solution under hackathon constraints.
- Secured **Top 3 Position (3rd Place)** at VIT Chennai Hackathon.
- Research paper based on this project is currently under publication process.

ACHIEVEMENTS

- **3rd Place – PES University Apex Club Hackathon –** Dysgraphia Detection using CNN.
- **Top 3 – VIT Chennai Hackathon –** Earvan AI-based Hearing Assistance Application.

CERTIFICATES

- Ultimate AWS Certified Cloud Practitioner – CLF-C02 (2026)– Issued by udemy
- IBM SkillsBuild Summer Internship Program – Artificial Intelligence – IBM SkillsBuild & CSRBOX (July–Aug 2024)– Issued by IBM
